

# Motherly love also fits inside a small container.

**Breast milk has everything a baby needs until it is 6 months old.** It also helps to reduce mortality and the risk of various diseases. In Brazil, 11% of newborns need the donation of breast milk to survive.

**Rede D'Or São Luiz** maternities are a reference in obstetrics in Brazil and offer complete infrastructure for babies and pregnant women. From the prenatal phase to breastfeeding.

**Every drop of breast milk represents a life.** And every milk container carries the love that only mothers feel.

**Share your motherly love!**
